

“ Where quality meets passion ”

# dyeing and aging guidance

Torcetex values excellence in all processes and, since 1956, transforms yarns and develops special fabrics from natural straw made with more than 80% cotton, through an original and innovative process.

 / fabrics **MADE OF COTTON**

 / **QUALITY ASSURED AT THE ORIGIN**

 / **SELECTION AND PROCESS 100% ORIGINAL** Torcetex

 / Torcetex **EXCELLENCE IN THE DISTRIBUTION PROCESS**

 / **SPECIALIZED TRAINING**

## torcetex fabrics

= design + style + versatility + high strength + comfort

the favorites of professionals in / **ARCHITECTURE - INTERIOR DESIGN - FASHION - FURNITURE - LANDSCAPING**

## dyeing

*All straws can be dyed or varnished and in both finishes it is possible to use dyes based on PU (polyurethane).*

**PU (Polyurethane):** apply a sealing layer with a gun, wait for it to dry, sand lightly using fine sandpaper and apply the dye. This process must be carried out with the straw already applied **on the final**

## aging

**Using Bitumen, acrylic colorant, and Turpentine: mix all in the proportion that achieves the desired color. Apply using a lint-free cloth or rag for a smooth finish.**
